ABSTRACT

Most of the 68 tests described in this bibliography are used with students in the secondary grade levels and up. There are a variety of instruments to assess school interests, intellectual attitudes and values, and attitudes toward specific subjects. Some are measures of vocational interest to aid students in selecting courses of study or to settle on a major consistent with their career goals. This document is one in a series of topical bibliographies from the Test Collection (TC) at Educational Testing Service (ETS) containing descriptions of more than 18,000 tests and other measurement devices prepared by commercial publishers, teachers, educational institutions, professional associations, departments of education, counselors, etc. Each description contains the following basic information: TC Accession Number (a six-digit identification number assigned by the Test Collection); the title of the instrument; personal or institutional author; year of publication or copyright; availability source; grade level for which test is suitable; age level for which test is suitable; and abstract. Other information, which is provided when known, includes subtests, number of test items, and time required to complete the test. Information on accessing the Test Collection via Internet concludes the document. (HAC)

INTRODUCTION

Scope of Bibliography

Most of the tests described in this bibliography are used with students in the secondary grade levels and up. There are a variety of instruments to assess school interests, intellectual attitudes and values, attitudes toward specific subjects. Some are measures of vocational interest to aid students in selecting courses of study or to settle on a major consistent with their career goals.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in Microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

AN - Six-digit identification number assigned by the Test Collection

TI - Name of the instrument

DT - Components within the overall test which assess particular skills or factors

AU - Personal or institutional author

YR - Year test was published or copyrighted

AV - Test publisher or distributor; the organization which sells or distributes the instrument

ITEMS: 399.
AB ABSTRACT: An interest inventory composed of 399 items related to post-secondary education. Supplies educational interest information specifically for the academic decision making concerns. Designed to identify for students those academic majors in which there is a pattern of interest similar to that of successful students who have earned degrees in that major. Most useful for high school students in grades 11 and 12, freshmen and sophomores in college and older students coming back to college. Items are arranged in six sections each of which focuses on a specific aspect of the educational experience of most students: course titles, educational experiences, instructor characteristics, personal preferences, educational preferences, educational self-concept. Because there are about 150 scales, it is necessary to use computer scoring. The scales are divided into six areas, educational area, educational cluster, school and college, academic major, academic achievement interest, educational level and check.

GL GRADE LEVEL: 4; 5; 6; 7; 8; 9; 10; 11; 12.
AB ABSTRACT: A series of placement tests, reading inventories, informal tests for assessing study skills, and inventories for

assessing student attitudes, habits and interests in general and in the three content areas. Used for screening groups of students prior to instruction, to determine general study skill abilities within content areas. Cloze reading inventories determine students' ability levels. Group reading inventories identify independent, instructional, and frustration levels. Study skills assessed are: locational, organizing, use of graphs, skimming and scanning. Other inventories measure: study strategies, interests in English, science and social studies, content knowledge and learning style.

AB ABSTRACT: Developed to measure non-cognitive factors associated with self-esteem or self concept in a school setting. Each item was prepared to represent an activity or attitude in the school environment. This is a self-report instrument that reflects perceptions students have of their place within the educational setting. Instrument serves two purposes: to identify students who may have difficulty in their schoolwork because of low self esteem and to diagnose, for purposes of guidance or counseling, those dimensions and associated activities that might contribute to low self esteem and to impair learning capabilities.

AB ABSTRACT: Latest edition of the Strong Vocational Interest Blank. Compares a person's interests with the interests of people happily employed in a wide variety of occupations. It is a measure of interests used chiefly as an aid in making curricular or career decisions. Respondents are scored on 6 general occupational themes,

23 basic interest scales, and 207 occupational scales. The general occupational themes are based on the six general occupational personalities proposed by John L. Holland. The basic interest scales measure the strength and consistency of the respondent's interest in specific areas, such as artistic activities. The occupational scales reflect the degree of similarity between the respondent's interests and those of people in particular occupations. There are also scores on two special scales that measure introversion-extraversion and degree of comfort in an academic environment plus 26 administrative indexes that help identify invalid or unusual profiles.

AB ABSTRACT: A paper and pencil career planning instrument that considers motivational, background, environmental, and personality factors. Students indicate level of agreement/disagreement with given statements and estimate their own level of verbal and mathematical ability. There are 19 subscale scores. Many of the scales are adaptations of instruments by such as Spence and Helmreich, Bem, and Super. C-MAP is designed to measure long-range commitment to an occupational life role, short range motivation to achieve at a particular task, and level of aspiration and education.

AB ABSTRACT: Instrument used to obtain and analyze information about a person's characteristics and background. Form U was developed primarily to help identify talents which are typically difficult to measure. May also be used in counseling, guidance, and talent teaching. Results of inventory are most effectively used when combined with other information in order to recognize and develop student potential. Use of inventory with students below grade 7 should be based on evidence of satisfactory reading ability (at

least fifth grade reading level). No time limit but most should complete inventory in about one hour. Form U has been designed so that responses can be optically scanned and computer scored at the availablity source. Is a research instrument.

AB ABSTRACT: In 1965 the International Association for the Evaluation of Educational Achievement (IEA) inaugurated a cross-national survey of achievement in six subjects: science, reading comprehension, literature, English as a foreign language, French as a foreign language and civic education. The overall aim of the project was to use international tests in order to relate student achievement and attitudes to instructional, social, and economic factors, and from the results to establish generalizations of value to policy makers worldwide. This questionnaire is used to find out what students think about science. It is for Population II, students aged 14 to 15 years, and Population IV, students enrolled in the final year of pre-university training. Answer keys can be found in ED 081 639. The second part of this questionnaire asks about science in the school and is a descriptive scale which measures the part science plays in the students' lives.

AB ABSTRACT: This questionnaire was used to survey the attitudes, program at school, and plans for the future of Mexican American high school students in Texas. Almost all of the questions consist of circling a number or checking one or more answers. A few require written answers. Topics covered by the questions are: the student's family background, school activities, attitudes about school, work, and life in general, what their parents do, feel, and think about their school, kinds of problems encountered while "job hunting," careers, jobs, and the labor market, how to go about getting a job, and employers. Attitudes about high school students, students' attitudes about employers, education or training necessary for certain jobs, and future educational and employment plans are also covered. There is one section for vocational students only.

AB ABSTRACT: Developed in Canada for use with Canadian students as a counseling tool in guidance programs. Stresses ipsative rather than normative approach to students' interests so that each student knows where he or she stands in relation to the inventory's measured occupational interest areas, regardless of other students' scores. There are three sections to the inventory. In one section, students must choose from 168 pairs of student interests in which occupational preference has been categorized into seven major areas: economic, technical, outdoor, service, humane, artistic, and scientific. A second section assesses students' school subject interests and a third level provides for students' self assessment of ability in the academic, mechanical, social and clerical areas.

ETS TEST COLLECTION VIA INTERNET

The ERIC Clearinghouse on Assessment and Evaluation has mounted on its gopher site a database to help locate tests. This database can be used by accessing the gopher at the address: GOPHER.CUA.EDU. The ERIC/ETS Test Collection is located under: Special Resources/ ERIC Clearinghouse on Assessment and Evaluation/ Test Locator/.

To search the database, enter keywords from the title or descriptors. For example, if you would like to search for tests on oral language proficiency, you could type in all three words, or oral and proficiency. You may get slightly different results, but you will have information on a lot of tests to look at. If you know the title of the test, the best way to search is to use the main words in the title, not necessarily all of the words in the title. If you are looking for the Wechsler Intelligence Scale for Children-Revised, the most efficient way to search is with the words Wechsler, intelligence, and children.

INTRODUCTION TO THE ETS TEST COLLECTION

The Educational Testing Service (ETS) Test Collection database contains records on over 9,500 tests and research instruments. These records describe the instruments and provide availability information. The Test Collection encompasses virtually all fields from vocational interest inventories for adults to instruments that measure shyness or predict recidivism in released criminal offenders, to assessment of managerial style, as well as education-related achievement and aptitude tests. The test descriptions are indexed with ERIC Thesaurus terms for subject accessibility.

This is a joint project of ETS and ERIC_AE. ETS Library and Reference Services Division prepares the descriptions. ERIC_AE maintains the database and hosts the Search System. ERIC_AE has also begun to put ETS prepared test descriptions into the ERIC *Resources in Education* database. About 15 descriptions are added each month.

You may download individual and small groups of test descriptions and you may point to this service from any Gopher Site.

WHAT KIND OF TEST ARE DESCRIBED?

The Test Collection database collects a variety of instruments: achievement tests, aptitude tests, personality measures, attitude measures, career/vocational interest measures, occupational tests such as nursing or sales skills inventories. Many research instruments are collected as well as tests from commercial publishers.

WHAT INFORMATION IS AVAILABLE ABOUT THE TESTS?

The title, author, publication date and source appear in the record. An abstract describing the instrument, intended population, and uses accompanies the record. Subject terms give the age and grade level information as well as ERIC Thesaurus terms that describe the test.

DOES THE TEST COLLECTION DATABASE REVIEW THE TESTS?

No, other reference guides such as Mental Measurements Yearbooks, Tests: A Comprehensive Reference for Assessments in Psychology, Education, and Business, and Test Critiques distributed by Pro-Ed fill that role. You can search the tables of contents for the MMY and Test Critiques through the ERIC_AE Gopher Site.

ARE ALL THE TESTS IN THE DATABASE CURRENTLY IN PRINT?

No, some of the items are out of print. We suggest contacting the publisher for permission to use out-of-print materials. Phone numbers can be located using another menu option on the ERIC_AE Gopher Site.

WHERE CAN I SEE THE ACTUAL TEST INSTRUMENTS?

Availability information is provided in the records. Many colleges and universities have test collections in their libraries. Talk to you local librarian for more information.

WHAT IS TESTS IN MICROFICHE?

Tests in Microfiche is a subcollection of unpublished research instruments that are available for purchase in microfiche from the ETS Test Collection. The collection includes instruments appropriate for diverse populations (infants, learning disabled, adults, etc.) Each set spans a wide range of topics such as job satisfaction and attitudes towards school. More than 800 tests are available.

DOES THE TEST COLLECTION PROVIDE REFERENCE SERVICES?

No, the descriptive information in the database should help answer most questions people may have. And the publisher of the particular test is the most competent source of information. You can, however, route general inquiries to ERIC_AE@CUA.EDU.
